**Teaching Overview:** The age of deception is here and thanks to digital technology is now even easier to fool people in mass numbers. A photograph, a video, and a any sound can be digitally manipulated to show something that is not really there. This lead us to the topic of why the US will (in part) be switching all broadcasts from analog to digital. This teaching overviews a secret Pentagon psychotronics technology known as Silent Sound Spread Spectrum (SSSS) that has been fully operational since the early 1990s. The physical, emotional, and psychological effects of this technology were so severe that 200,000 Iraqi troops surrendered en masse without firing even a single shot against US led coalition forces. Iraqi troops would come out of their deep desert bunkers waving white flags and falling to their knees before approaching US troops and literally kiss their captor's boots or hands if given the opportunity.

Why would eight year veterans of Middle Eastern warfare (with Iran 1980-1988) behave this way? Simple. They were subjected to a technology that was so extreme and incomprehensible that they were suddenly reduced to the level of compliant children and felt grateful to still be alive in the wake of their mind-

**wrenching experience. This technology is (most likely) about to be used, albeit in a more subtle fashion, against American citizens in a highly classified and covert operation to mind control and manipulate the entire population into 'compliance' with our New World order overlords. The technology will utilize a combination of HAARP transmitters, GWEN towers, microwave cell phone towers, and the soon-to-be-mandatory High Definition Digital TV that will enter your home via: a) cable, b) satellite, c) HD TVs, or d) those oh-so-easy-to-obtain "digital converter boxes" that the government is so anxious to help you obtain and underwrite most of the cost on your behalf.**

---

## **The Real Reason Behind The Switch from Analog to Digital**

The age of deception is here and thanks to digital technology is now even easier to fool people in mass numbers. Seeing & hearing is no longer worth believing when it comes to digital technology. A photograph, a video, and a any sound can be digitally manipulated to show something that is not really there. This lead us to the topic of why the US will be switching all broadcasts from analog to digital.

The answer is a two part answer; first, the most obvious reason is because with digital broadcasting, it would be incredibly easy to manipulate a live image. So what does that mean, you may ask?

That means that they can show you for instance a "terrorist act" taking place that really never took place and then use the images as proof of why we must retaliate and go to war with a particular nation. This is very dangerous stuff.

Another reason why the switch from analog to digital is taking place, is a more malignant reason, and as reason # 1, most people are not aware of it and they should. Undisclosed sources, experts on reverse technology have informed that any television set manufacture after 1995 has the capability not only to receive a broadcast signal, but to also send one. That's correct, any television manufactured after 1995 already has a built in feature to send a broadcast signal from your living room of live images of what's happening in your home.

## Digital TV: Mind Control by the Sound of Silence

A. True Ott, PhD, ND | [Educate Yourself.org](http://EducateYourself.org) 11,529 VIEWS

December 15, 2008

### Editor's Note

This is an extremely timely and important essay. It overviews a secret Pentagon psychotronics [technology](#) known as *Silent Sound Spread Spectrum* (SSSS) that has been fully operational

since the early 1990s. I first found out about the use of this technology from Al Bielek in a 1992 video he made with Vladimir Terziski. This technology was used against battle-hardened Iraqi troops fortified in deep underground bunkers in Kuwait and Iraq in the first Gulf War in January of 1991.

The physical, emotional, and psychological effects of this technology were so severe that **hundreds of thousands** of Iraqi troops surrendered en masse *without firing even a single shot* against US led coalition forces. The numbers reported in the news were staggering: 75,000 and then another 125,000 (or more) Iraqi troops would come out of their deep desert bunkers waving white flags and falling to their knees before approaching US troops and literally kiss their captor's boots or hands if given the opportunity.

Why would eight year veterans of Middle Eastern warfare (with Iran 1980-1988) behave this way? Simple. They were subjected to a technology that was so extreme and incomprehensible that they were suddenly reduced to the level of compliant children and felt grateful to still be alive in the wake of their mind-wrenching experience.

**This technology is about to be used**, albeit in a more subtle fashion, **against American citizens** in a highly classified and covert operation *to mind control and manipulate the entire population into 'compliance' with our New World order overlords*. The technology will utilize a combination of **HAARP** transmitters, GWEN towers, microwave cell phone towers, and the soon-to-be-mandatory High Definition Digital TV that will enter your home via: a) cable, b) satellite, c) HD TVs, or d) those oh-so-easy-to-obtain "digital converter boxes" that the government is so anxious to help you obtain and underwrite most of the cost on your behalf.

But why is the government so anxious to help American citizens experience a clearer and more highly defined television picture? Does that make sense to you? Since when is the government so concerned about the visual quality of our televised entertainment that congress would pass an *undebated* statutory proclamation which **mandated** that the [HD](#) conversion take place on Feb. 17, 2009 and then subsidize about 90% of the associated cost?

I'm only guessing, but if there are 200 million "regular" televisions in America to be converted into HD, then that \$40 in government subsidy per TV  $\times$  200,000,000 = **\$8 billion**. Why is the government so anxious to spend **8 billion dollars** on her citizens to improve the clarity of a TV picture? Or is the recently touted "additional [bandwidth](#)" cover story that supposedly is to be gained with the HD technology *the only and genuine* reason for spending so much taxpayer dollars on HD conversion?

The second service that this author performs is to “out” two of our more deceptive CIA/Pentagon ‘assets’ masquerading under the rubric of natural health advocates. Their names are **Rima Laibow** and her husband, “former” Major General **Albert Stubblebine**. If your e-mail Inbox has been filling with warnings and articles in recent months about the coming Codex regulations and the “wonderful” job that Rima and her retired Army husband have been doing to try and stem the tide, then you know who I’m talking about.

Folks, is it time to *wake up* yet? Or should we just resume our slumber and wait for them to take us away in those spiffy Gunderson cattle cars that Phil Schneider warned us about in 1995 (you know, the ones with the built in shackles and manacles)?

Ken Adachi, [Educate Yourself.org](http://www.educateyourself.org)

## THE SOUND OF SILENCE

### The Antithesis of Freedom

The year was 1961, and John Kennedy was soon to become the 35th President. Shortly before Kennedy’s inauguration, President Dwight D. Eisenhower shocked the nation and the world with his televised farewell speech. The speech’s content was shocking because General Eisenhower was a very popular war hero, and [American military](#) might was second to none.

Eisenhower, a highly decorated five-star general, was the Supreme Commander of all allied forces during World War II. It was Eisenhower’s leadership during the Normandy invasion that ultimately freed Europe from the Nazi scourge.

Incredibly, in his farewell address, this great American hero did not warn the nation of the budding communist threat or the horrors of nuclear proliferation. No, not at all! Instead, this career [military](#) genius poignantly and soberly declared to this great nation:

*“... We have been compelled to create a permanent armaments industry of vast proportions. Added to this, three and a half million men and women are directly engaged in the defense establishment. We annually spend on military [security](#) more than the net income of all United States corporations.*

*“This conjunction of an immense military establishment and a large arms industry is new in the American experience. The total influence — economic, political, even spiritual — is felt in every city, every state house, every office of the federal government. We recognize the imperative need for this development. Yet **we must not fail to recognize its grave implications**. Our toil, resources and livelihood are all involved; so is the very structure of our society.*

*“In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex. The potential for the disastrous rise of misplaced power exists and will persist. **We must never let the weight of this combination endanger our liberties or our democratic processes.**”*

Here we have a career military officer, and sitting US President warning the nation in his final farewell speech, that something called “unwarranted influence by the military-industrial complex” poses an extremely dangerous threat to our Free Republic society. According to Eisenhower, this threat “exists and will persist.”

To President Eisenhower, in January of 1961, this evil was a much greater threat to America than Castro’s Cuba or Khrushchev’s Soviet Union. What exactly could have happened in the “military-industrialist” establishment that would have caused

Eisenhower to issue such a strongly worded warning? Improved machine gun production? Nope. Battleship production? Nope. Nuclear submarines? Nope. Proliferation of nuclear warheads? A concern of course, but a concern that most Americans were fully aware of.

No, obviously what caused Eisenhower such deep concern had to be something much more pervasively shadowy, dark and secret. **Some new, covert, technology** had clearly emerged that had the very real potential to provide certain individuals with the “acquisition of unwarranted influence” that in turn would “endanger our liberties or our democratic processes” (i.e., our free and fair *election process*). In other words, it had the clear potential to circumvent the voice of the people and completely empower un-elected power mongers.

Eisenhower, I would submit, was warning America about something called the “**Sound of Silence**”.

Eisenhower was an honest and patriotic American. Like Marine Corp General [Smedley Butler](#), who decades earlier declared to Congress that “War is a Racket,” Ike knew that such absolute power and total covert control over the minds and hearts of individual citizens would corrupt society absolutely. He also knew and understood, as did the German philosopher Goethe: “No

*man is more hopelessly enslaved, than he who falsely believes that he is free.*” Therefore, he issued his strong, concluding warning to America. Today, this author must do no less.

The Sound of Silence is a military-intelligence code word for certain **psychotronic weapons of mass mind-control** tested in the mid-1950s, perfected during the 70s, and used extensively by the “modern” [US military](#) in the early 90s, despite the opposition and warnings issued by men such as Dwight David Eisenhower.

This **mind-altering covert weapon** is based on something called *subliminal carrier technology*, or the *Silent Sound Spread Spectrum (SSSS)* (also nicknamed S-Quad or “Squad” in military jargon). It was developed for military use by Dr. **Oliver Lowery** of Norcross, Georgia, and is described in US Patent #5,159,703 — “Silent Subliminal Presentation System” for commercial use in 1992. The patent abstract reads:

*“A silent communications system in which nonaural carriers, in the very low (ELF) or very high audio-frequency (VHF) range or in the adjacent ultrasonic frequency spectrum, are amplitude- or frequency-modulated with the desired intelligence and propagated acoustically or vibrationally, for inducement into the brain, typically through the use of loudspeakers, earphones, or piezoelectric transducers. The modulated carriers may be transmitted directly in real time or may be conveniently recorded and stored on mechanical, magnetic, or optical media for delayed or repeated transmission to the listener.”*

In layman’s terms, this device, this “Sound of Silence” simply allows for the **unwarranted implantation of specific thoughts, emotions, and even prescribed physical actions into unsuspecting human beings**. In short, it has the very real ability to turn human beings into mere puppets in the hands of certain “controllers,” or puppet-masters.

Eisenhower knew full well what such a “weapon” could do in the hands of greedy, conspiring men and women scheming to control the planet. It could easily result in the **takeover of American society without a single bullet being fired**. This is what he was warning America about, this is the “combination” he feared above all others.

Have the leaders of America ignored Ike’s warning? Have conspiring and evil men and women utilized this diabolical technology on unsuspecting Americans and others outside of our borders? If so, *will they continue to utilize the technology through the medium of television and radio?* This exposé will attempt to answer these questions, and give the reader a clear picture of exactly who made the decisions to use the “Sound of Silence” in both war and peace.

On March 23, 1991, a news brief was released in the form of an ITV News Bureau Ltd (London) wire service bulletin entitled “*High-Tech Psychological Warfare Arrives in the Middle East.*” This was during the administration of George Bush Sr., during “Operation Desert Storm,” and describes in remarkable detail a US Psychological Operations (psy-ops) covert operation successfully deployed against Iraqi troops in Kuwait.

Saddam Hussein’s vaunted “Republican Guard” crack troops were promising Bush “the mother of all battles” with many thousands of dead coalition troops. On paper, it looked convincing. Hussein’s Republican Guard troops were battle-hardened veterans of the 10 year war with Iran, while coalition troops were unblooded. The Iraqis had modern weaponry and were well trained in how to use it.

Something very strange happened, however. The “mother of all battles” ended before it began, as literally hundreds of thousands of Iraqi soldiers surrendered en masse without even firing a shot!

Here is what the British press reported on the incident (while the American press was censored):

*“... an unbelievable and **highly classified** psy-ops program utilizing ‘Silent Sound’ techniques was successfully deployed. The opportunity to use this method occurred when Saddam Hussein’s military command-and-control system was destroyed. The Iraqi troops were then forced to use commercial FM radio stations to carry encoded commands, which were broadcast on the 100 MHz frequency. The US psy-ops team set up its own portable FM transmitter, utilizing the same frequency, in the deserted city of Al Khafji. This US transmitter overpowered the local Iraqi station. Along with patriotic and religious music, psy-ops transmitted ‘vague, confusing and contradictory military orders and information. **“Subliminally**, a much more powerful technology was at work, however. A sophisticated electronic system designed to ‘speak’ directly to the mind of the listener; to alter and entrain his brainwaves, to manipulate his brain’s electroencephalographic (EEG) patterns and thus artificially implant negative emotional states — feelings of intense fear, anxiety, despair and hopelessness were created in the Iraqi troops. This incredibly effective subliminal system doesn’t just tell a person to feel an emotion, **it makes them feel it; it implants that emotion in their minds.**”*

While utilizing such a “non-lethal” covert psy-ops weapon resulted in many lives being saved, both American, Coalition, as well as Iraqi, the question begs to be asked: **how can Americans**

**be assured that such a weapon is not being used on them by “Big Brother” on a daily basis?**

Moreover, why was the *real story* behind the mass Iraqi surrenders censored so completely from the American people? Typically, secrecy of this nature is only employed when the subject is morally offensive, or when the powers that be wish to continue to deploy the subject without public scrutiny or oversight, or both. Clearly, if such a device employed covertly on Americans could result in “unwarranted influence” over a society, as Eisenhower warned, I submit the majority of Americans would be completely outraged and incensed, and rightfully so. Therefore, of course the technology would need to remain hidden away.

Officially, the Sound of Silence (S-quad) technology does not exist, just as the US Government officially denies the existence of UFOs and Area 51 (Groom Lake) in the Nevada desert. However, the physical realities cannot be ignored by the rational and logical mind.

For instance, during the first Gulf war, *the man who most likely ordered the deployment of the Sound of Silence* was Major General **Albert (Bert) Stubblebine**, who was the Commanding General of the US Army’s *Intelligence School and Center*, as well as the Army’s *Electronic Research and Development Command (ERADCOM)* as well as the Army’s *Intelligence and Security Command (INSCOM)*. In short, Albert Stubblebine was the Army’s liaison with the CIA and *Naval Intelligence operatives (ONI)*, and as head of ERADCOM, he would of necessity have had complete working knowledge of the Sound of Silence weaponry, if indeed it truly exists.

He was the US Army’s top spy-boss, and of course, was privy to all its secrets. Now retired from active duty following a 32 year career, General Stubblebine has combined with his wife, **Rima Laibow** to form something called the **Natural Solutions Foundation**, supposedly dedicated to fighting all *health freedom threats* to individuals including Codex Alimentarius, vaccinations, and of course the FDA Gestapo.

On their website, [www.healthfreedomusa.org](http://www.healthfreedomusa.org) one can read this about Albert N. Stubblebine: *“Many of the innovations he developed helped the US to conduct the First Gulf War effectively and swiftly with a very low casualty rate.”*

But of course, such “innovations” are never fully disclosed to Americans and are officially non-existent. With all due respect to General Stubblebine and shadowy power-brokers such as **Frank Carlucci** and **Donald Rumsfeld**, this author concurs whole-heartedly with General Eisenhower, and I declare that such posturing and secrecy with weapons of mind-control

constitutes indeed an “acquisition of unwarranted power and influence” and has *absolutely no place in a free and open society* — no matter how many soldier’s lives it may save on the battlefield. The potential for massive misuse and abuse of such immense controlling power is simply too great.

Furthermore, with all due respect Mr. Stubblebine, is he and Rima Laibow using the cover of Natural Health activism to hide their true agenda? *Could this hidden agenda be the covert promotion and testing of Sound of Silence equipment and technology commercially throughout the world?*

... Immediately after “retiring” from the army, General Stubblebine took a position as the “VP for Intelligence Systems” with Braddock, Dunn, and McDonald (BDM), a major defense contractor owned by the shadowy Carlyle Group and ex-Defense Secretary **Frank Carlucci** of Iran-Contra infamy...

Since the Sound of Silence machine technology was patented for “privatization” commercial applications by Dr. Lowery on October 27, 1992 , it clearly opened the door to private defense contractors such as BDM to develop their own “intelligence systems”. It would then make sense to employ General Stubblebine as a consultant. Of course, what would then stop BDM from quietly marketing and selling the Sound of Silence to large corporations tied to Wall Street?

For example, imagine utilizing the Sound of Silence in a large Wal-Mart store, mixing the ELF waves with background music to subliminally brainwash dishonest shoppers **not** to engage in shoplifting? Such a device would save Sam Walton many millions of dollars in lost revenue every year.

Suppose also that a young, black man from Illinois was given access to, and was able to utilize the S-quad Sound of Silence technology in his public speeches, radio and 30-minute television “infomercials” — all programmed and designed by “handlers” to illicit strong emotional responses from audience members who then are merely *“hearing without listening.”*

Moreover, what if televisions across the US and Canada all went 100% digital [to be mandatory in Feb. 2009] in their signals (in order to successfully link to GWEN towers) which would allow the **unrestricted** use of the Sound of Silence frequencies in a **complete and massive control of the nation’s mind and consciousness?**

I am telling you **that is exactly what is happening**. President Eisenhower was absolutely correct, and his worst fears were indeed well founded!

**The military-industrialist complex has quietly completed the takeover of the nation's consciousness, and thus its very soul.**

... Keep in mind that taking complete fascist control of America is just one step of the Zionist elites ultimate agenda, of which Stubblebine and Laibow have very likely pledged their true loyalty. The elitist Zionists overall objective is indeed absolute world control, something they refer to as a "New World Order" with them as dictators and overlords.

Again, the *absolute secrecy* surrounding the development and deployment of the electromagnetic mind-altering technology of the Sound of Silence in a very real way reflects the tremendous power that is inherent in it. This is why Eisenhower knew that he **had** to warn the nation about it back in 1961. To put it bluntly, **whoever controls this technology literally has the power to control the minds of men — all men and women everywhere.**

Of course, whoever controls the minds of all humans, controls the wealth and destiny of planet Earth. Furthermore, Stubblebine, as commander of Army Intelligence would likely follow the prescribed manual of all covert ops, such as is found in a declassified US manual for the planned subversion and coup of the government of Nicaragua. The manual instructs the CIA "guerilla forces" to engage in different "false front" organizations designed to win the respect, trust, and influence of the enemy. Once complete trust and confidence is achieved by means of the activities of the "false front," then the destruction of the enemy by means of misdirection and disinformation tactics can more easily be executed.

I would submit there is no better "false front" to infiltrate in America than Natural Health proponents, for they are typically healthier, better informed, and more dedicated to preserving individual freedoms and fighting tyranny than other Americans. Thus, there could be no better "false front" to establish, and there is clearly no more potentially vicious wolf hiding in sheep's clothing than the man who knows more about the Sound of Silence secret deployment than any other human...

There is ample evidence that certain elitists in America and Israel plan to definitely extend the capacity of this technology to encompass all people on every continent. A key to this is the HAARP project where ELF and VHF frequencies can indeed be beamed off of the Earth's ionosphere to various GWEN towers world-wide.

Of course, the US Government officially denies all of this, telling the talking heads of the controlled news media that the GWEN towers are merely private cell-phone towers with no ulterior agenda, and therefore anybody who thinks otherwise is a lunatic-fringe conspiracy nut.

The evidence to the contrary, however is clear and unequivocal. Dr **Michael Persinger** is a professor of psychology and neuroscience at Laurentian University, Ontario, Canada.

Concerning this subject, Dr Persinger writes:

“Temporal lobe stimulation can evoke the feeling of a presence, disorientation, and perceptual irregularities. It can activate images stored in the subject’s memory, including nightmares and monsters that are normally suppressed. Contemporary neuroscience suggests the existence of fundamental algorithms by which all sensory transduction is translated into an intrinsic, brain-specific code. Direct stimulation of these codes within the human temporal or limbic cortices by applied electromagnetic patterns may require energy levels which are within the range of both geomagnetic activity *and contemporary communication networks*. A process which is coupled to the narrow band of brain temperature could allow all normal human brains to be affected by a sub-harmonic whose frequency range at about 10 Hz would only vary by 0.1 Hz.”

Dr Persinger concludes the article by writing:

“Within the last two decades a potential has emerged which was improbable, but which is now feasible. This potential is the technical capability to influence directly the major portion of the approximately 6.5 billion brains of the human species, without mediation through classical sensory modalities, by generating neural information within a physical medium within which all members of the species are immersed.

“The historical emergence of such possibilities, which have ranged from gunpowder to atomic fission, have resulted in major changes in the social evolution that occurred inordinately quickly after the implementation. Reduction of the risk of the inappropriate application of these technologies requires the continued and open discussion of their realistic feasibility and implications within the scientific and public domain.”

How can one have an “open discussion” on the subject when government circles continually deny the existence of such technology?

<http://www.wariscrime.com/2008/12/15/news/digital-tv-mind-control-by-the-sound-of-silence>

---

Dr. Ott has just done a great job of **exposing** the (so called) "**Natural Solutions Foundation**" (Rima Laibow, MD and Major General Albert Stubblebine) on Rebecca Carley MDs radio show called "**Whats Ailing America?**" and I urge you to listen to the archive of last Saturday's show which can be heard here:

[http://216.240.133.177/archives32/Carley/2008/12/Carley\\_1\\_121308\\_140000.mp3](http://216.240.133.177/archives32/Carley/2008/12/Carley_1_121308_140000.mp3) Ott has some particularly interesting facts to relate about General Stubblebine and his involvement with **CIA black operations** pertaining to "Silent Sound" technology which was used during the first Gulf war to cause thousands of Iraqi troops to surrender en masse.

If you aren't familiar with the **immense problem** of NSF being a controlled opposition group, please see <http://www.nocodexgenocide.com/page/page/3312735.htm> <http://www.nocodexgenocide.com/page/page/3112930.htm> and especially this enlightening article by Paul Taylor of the Dr. Rath Health Foundation [http://www4.dr-rath-foundation.org/THE\\_FOUNDATION/Events/codex-moderngeneral.html](http://www4.dr-rath-foundation.org/THE_FOUNDATION/Events/codex-moderngeneral.html) (and read the links from this article about General Stubblebine).

In tomorrows radio show you will see just how NSF has been trying to steer unwitting vitamin consumers and alternative practitioners into **dead ends** and into **superfluous courses of action and phony fundraising** intended to divert our efforts in many ways so that we won't be able to successfully stop Codex. General Stubblebine and Dr.Laibow are highly skilled manipulators, and Dr.Carley and I will build on Dr.Ott's efforts to expose them in the hope of successfully countering their efforts against us.

Reader Reports Finding Micro Cameras in LCD and Plasma TVs  
(re: Mandatory HD TV Conversion)

[http://www.fourwinds10.com/siterun\\_data/media/television/news.php?q=1226003036](http://www.fourwinds10.com/siterun_data/media/television/news.php?q=1226003036)

[Editor's Note: I received this e-mail from a reader overseas. I changed his name to "Blue Man" . I speculated in earlier articles that the mandatory switch over to High Definition TV is driven by a covert surveillance/monitoring agenda and mentioned that it was possible that tiny cameras are now being embedded in newer LCD monitors and TVs. This fellow reports that he has actually taken apart these newer TVs and has discovered said surveillance cameras. I've asked him to send me photos of the hidden cameras so I can post them. Perhaps others with access to these TVs can verify this report and get back to me on it

**Oct. 25, 2008:** If you read the letters posted at the bottom, you will see that Apple now openly boasts of a large LCD screen that is embedded with multiple cameras. As in the case of tracking cell phone movement via GPS, which anyone can do now via the Internet, Big Brother wants to get the public to accept his monitoring and surveillance agenda openly; and even come to embrace it as desirable. That's the ultimate in total control ~ willing slaves who will police themselves. . . .Ken Adachi]

Subject: HD TV

From: Blue Man

Date: Sun, October 19, 2008

To: Ken Adachi

This chap is right on the button about delay times with HDTV, but I wonder if anyone has had the nerve to open up their new plasmas and LCD TV's? If you do, then search a little and you will find the answer to why HDTV is being made mandatory around the world.

In 4 separate name brands of these devices, we have found a tiny camera.....yes, a camera.....focusing on YOU!

Try it your self, don't take our word for it, but we are finding heaps of them. So, who wants to know what goes on in your household?

Same people who operate the cameras in traffic!! Get rid of your TV, and get a life!

Blue Man

Subject: Tiny Cameras

Ken,

I had to laugh when I read the article about cameras hidden in TVs, as if that's anything "new"? Haha.

Back in 1998 when I was in high school doing my Senior Project for school, I did it on private investigation, and I met a local PI. He was an international PI, and he owned a few other businesses besides that PI firm, one being that he built custom computers for people. He showed me one of those drawer cabinets that you keep little electronic parts and etc. in. What was in it? Tiny spy devices he had pulled out of COMMERCIAL computers mostly. I became enlightened that day.

He told me that EVERY commercially available.. let me repeat that.. EVERY computer had these devices. Keystroke recorders, cameras, mics, etc. It's so amazing that someone is finding a camera in a TV NOW 10 years later? The really amazing part is that they actually are able to find one in the first place, I'd have thought they'd have improved on the technology to the point that it wouldn't be visible at all to an untrained eye or something. For the technologically impaired, don't be amazed by stories like this, there are more things out there than any of us even has a clue exists, and there's only honestly one way to stop the invasion of privacy.. don't live on Earth.. or don't have anything to hide? :)

You have my permission to post this comment, without my real name, for radionic/energetic security reasons. Thank you.

Nikola

Subject: Thoughts on Cameras and Tracking Systems in New Television

Hi Ken,

Hope you can find someone who has taken apart the new HDTV screens. However, the old communications problem of moving data to some external source still applies. While this might be possible with broadband cable communications, there is still the classical problem of communications transport. When a person has broadband internet, their service utilizes a cable modem to perform the "drop and insert" outgoing communication packet into the data stream. But with broadband television cable, the issues become a little more complicated.

And since the new HDTV allows people who are not on cable or who are using satellite to access HDTV, then the data transport becomes more critical.

However, the "broadband over power line" (BPL) technology solves the problem nicely for TPTB, and here the USA is far behind Europe. ([http://en.wikipedia.org/wiki/Power\\_line\\_communication](http://en.wikipedia.org/wiki/Power_line_communication)). **Then any device that draws power can be an internet access point and communicate any information as so desired.**

My personal take is that HDTV was planned for the surveillance capability but that BPL was the intended transport mechanism, and thanks to organizations such as ARRL [American Radio Relay League], the lemming-like rush [for BPL] has been delayed. Also I would suggest that you make a post asking for anyone to seriously look at the guts of the digital TV conversion box to see if anything is not quite what it should be.

Best wishes as always.

Regards,

Sandy

Subject: HDTV

Hi Ken,

Well, I sent you a note about my thoughts on HDTV and I was wrong. I realized after I sent you my note that I should have done some investigation into HDTV communications protocols before I made any comment about whether or not video signal traffic could be carried back from an HDTV device, and during a review this morning found that the HDTV communications protocol is designed to carry full video channel traffic back from the user end for "video conferencing". With the intended merging of PC/Games/Video, the protocol is structured for video signal traffic from the user device back to a central point.

My comments about "Broadband over power line" still stand. There are major revisions to HDTV protocols planned for to carry HDTV via IP, and in that sense, the USA is far behind where things stand in Europe (no surprise there!).

Regards,

Sandy

Subject: HDTV cameras

Hi Ken,

How do you find or turn off or put a cover over a full-screen camera? If Apple is openly talking about making these, can't we assume that it is already being implemented, part of the HDTV switch?

<http://www.newscientist.com/article/dn9059-invention-apples-allseeing-screen.html>

Apple's all-seeing screen

We could soon see a new kind of display screen from computer maker Apple – one that simultaneously takes pictures while showing images.

The clever idea is to insert thousands of microscopic image sensors in-between the liquid crystal display cells in the screen. Each sensor captures its own small image, but software stitches these together to create a single, larger picture.

A large LCD screen filled with image sensors would be ideal for videoconferencing, Apple suggests, as participants would always appear to look straight into the "camera". The technique could also add a camera function to a cellphone or PDA without wasting space, and light from the screen should help illuminate a subject.

The more sensors there are, the wider and clearer the image. Sketches accompanying the company's patent show as many sensors as liquid crystal cells in a screen. If some of the sensors have different focal lengths, switching between them would make the screen behave like a zoom lens.

Terry Wilson

Hi Terry,

Thanks for this info.

Not buying or using them is the simplest solution. If the existing cameras can be exposed and if enough people get upset, they won't sell and they will pull the cameras-or try to pretend they have.

Regards, Ken

#### More on the HDTV Switch Over (& CFL Bulbs)

Subject: regarding HDTV switchover

Hello Ken,

I feel perhaps it is important to explain or remind people that a delay in a digital image video always happens as the information has to be decoded. In an analogue TV aerial, the picture is instantly sent to the cathode ray or similar device from the aerial and electronic components, it is not changed digitally at all, all this happens at near speed of light. In a digital television the information is set to a computer chip within the television which decodes the digital information (taking time) using algorithms and then sending it to the cathode ray, although most modern TVs are LCD the same decoding time process applies. You can see this same effect through non-HDTV which is sent by satellite (its still digital), so its not an new and specific HDTV issue.

The changeover to complete digitalisation has been in the works for a very very long time in England, where I live, and I recall a conversation I had with technicians from British Telecom regarding what they call the "21C" (century) project which is to digitalise and connect to the internet nearly all communications. This is why we are seeing systems, albeit sometimes failing systems such as: digital radio, digital television and (VoIP) voice over IP phone systems. I believe the main cause for a switchover is that surveillance is much easier within a digital system which can be directly connected, through the internet, to the central databases. It also prevents someone from broadcasting a signal locally to hi-jack the transmission, well at least from doing this easily. Whilst this is most likely connected to the agenda, I thought that it may help to stop some of the delay paranoia and focus on the real issue, as they could do that without HD anyway and chances are most already do.

Kind Regards,  
Sam

\*\*\*

Hi Sam,

Thanks for your input. I appreciate hearing from you. I just got an e mail a couple of days ago from someone that parallels almost word for word a 30 minute 'explanation' I just recorded yesterday from the Public television station explaining the purpose behind the HDTV switch over. This is all being forced, we are told, in the interest of gaining more bandwidth for fire and police communications! And don't forget that razor sharp image if you own a digital TV! Easy and simple to understand once it's explained to you, isn't it? Nothing to be concerned about.

I find it interesting that the 'explanation' is being promoted NOW, rather than 7 or 8 months ago when they started to inform us of the mandatory switch over to digital. I guess it took Tavistock a while to come up with something that sounded plausible and reasonable.

Police, fire, military, etc., etc. ALREADY have all the bandwidth they've ever needed, as it was allotted to them by the FCC many decades ago. The FIRST priority went to these organization in assigning bandwidth allocation from the government, not to the general public for AM, FM and TV bandwidth allocation. Of course, the military, police, etc. will grab at any opportunity --or excuse--to gain additional bandwidth for their exclusive use. Of course! So what else is new? But do they expect us to believe that this was the pressing REASON why they are eliminating analog TV transmission? No, no, no. I'm sorry, I'm not buying that. This is a back door attempt to get the public to go along with their manipulative agenda.

A digital TV signal is totally malleable and can be seamlessly altered with computer technology. That means that they can REMOVE anything desired from the scene being televised OR they can INSERT anything desired INTO the picture being telecast and the viewer WON'T KNOW that any manipulation has taken place. That explanation is much closer to the REAL REASON behind the switch over, rather than specious explanations about additional bandwidth for fire and police.

In addition, I suspect that there is hidden MONITORING and SURVEILLANCE technology embedded within digital TV sets- meaning CAMERAS and microphone pickups- that can monitor your home activity and be sent back to NSA computers. I also suspect that this technology is now embedded in cable TV boxes and those converter boxes they tell us are necessary for converting the digital signal for use by analog TV sets. It's also possible that there are micro-cameras in the newer LCD computer monitors.

We've known for many years that the NSA can record the conversations in your home via the telephone, even when it's sitting on the cradle and the phone is "hung up". The only way to stop that is to disconnect the phone wire from the wall.

Now, we see articles on the internet that tell us that the NSA can record anything within hearing range of a cell phone, -even when it's turned off. You have to remove the battery entirely to stop that monitoring.

We see a similar phony bill of goods being forced down the public's throat with the elimination of incandescent light bulbs, to be replaced by compact fluorescent lighting (CFL). There is more going on with this switch over than the public is aware of. A CFL bulb contains an ELECTRONIC CIRCUIT board within the base of the bulb. That circuit board COULD contain all sorts of hidden nanotechnology that the public is unaware of-including monitoring technology. A CFL bulb RADIATES a high voltage electromagnetic field around itself that COULD itself act as a carrier of hidden mind control/mind influencing technologies. This mind influencing technology could also possibly work in tandem with the high frequency "Lilly wave" signal being covertly piggy-backed onto electrical wiring entering our homes today and may be intended to work with the hidden mind control capabilities of microwave cell phone towers.

Anyone who has become sensitive to EMF pollution will tell you how adversely they are affected by fluorescent lighting in an office building or department store. A CFL "bulb" is a smaller fluorescent light tube that has been twisted into a circular shape. It's STILL fluorescent lighting! And it carries all of the EMF pollution problems associated with its bigger, 4 foot long counterpart.

There is NO LOGICAL justification for MANDATING an end to incandescent light bulbs! All of their phony [Global Warming propaganda](#) does not justify the outlawing of a simple incandescent filament carrying electrons which produces light. I hope enough people wake up to all the Tavistock sweet talk and demand that incandescent bulbs continue to be available to the public.

Regards, Ken
